NNH Nozzle Holders are designed for attaching blast nozzles with 50mm contractor threads to the blast hose. Light weight and durable, the nozzle holders are ideal for all compressed air blasting operations.

PanBlast™ NNH Nozzles Holders -

-BAC-NZ-PB-0023 -BAC-NZ-PB-0024

Manufactured from tough injection molded nylon, the NNH Nozzle Holder will not cause galling with aluminium threaded nozzles. An internal raised thread allows ease of fitting to the blast hose and prevents the nozzle holder inadvertently slipping off the hose.

PanBlast™ ANH Nozzles Holders -

PanBlast™ ANH Nozzle Holders are manufactured from a lightweight cast aluminium composite, and designed for use with either 3/4" or 50mm threaded nozzles. PanBlast™

ANH Nozzle Holders are extremely resilient and ideally suited for use in environments where there is a likelihood of damage from other plant or machinery.

Raised internal rings aid in preventing air leakage, and increases hose to nozzle holder gripping force.

Use ANH Nozzle Holders only on suitably sized blasting hoses. Ensure hose ends are cut square and hose butts up firmly to nozzle holder shoulder, when installing.

Pan Abrasives also have an extensive range of blast nozzles, blast hose, hose and pot couplings, and a full range of gaskets and washers to suit.
