PanBlast™ EcoPro ATN And ABN Blast Nozzles

Pan Abrasives range of PanBlast™ EcoPro ATN and ABN Blast Nozzles are a general purpose, durable, long venturi type blast nozzle suitable for a wide range of abrasive blasting applications.

Designed as a cost effective nozzle, all PanBlast™ EcoPro blast nozzles feature a durable aluminium outer jacket which protects the nozzle insert from damage.

The EcoPro nozzles are available with either Tungsten Carbide (ATN), or Boron (ABN) inserts, in sizes from number 4 through to number 8.

This means that there is a PanBlast™ EcoPro blast nozzle to suit most applications and abrasive types, with insert characteristics ranging from the low cost, tough tungsten carbide (ATN) through to the lighter weight, more durable boron (ABN).

The PanBlast™ EcoPro range of nozzles also includes a short series, the ATN-S and ABN-S, which feature straight bore inserts and 3/4" threaded outer jackets, and sizes as small as number 2.

These smaller nozzles are ideally suited to smaller capacity blast pots and pressure blast cabinet applications.

All other EcoPro nozzles feature a 50mm coarse contractor thread.
