

EXTENSION

Step boldly where others fear to tread

It takes a truly unique ladder to protect your workers and your business. Why take risks?

Only one ladder has an extra margin of safety. The unique Strongbox construction in a Branach ladder makes it stronger and more rigid than any other fibreglass ladder on the market. Yet it is still lightweight and easy to handle.

The companies that demand the highest safety standards, all choose Branach fibreglass extension ladders.

Look around, you'll see the Branach name on the top of vehicles owned by major power companies, electrical contractors, cabling and telecommunication companies.

Branach ladders are lighter than timber ladders, stronger than aluminium and have higher load ratings than comparable "C" section ladders.

Extension ladders come in two models:

The PowerMaster for the everyday user who appreciates the ease of use and advanced features and the TradeMaster to suit the budget conscious or less frequent user still looking for the benefits of the Branach ladder.

Never compromise on safety quality.
Insist on Branach.

BRANACH

WORLD'S BEST SAFETY LADDERS

World's best safety insurance

PowerMaster
